Parental Consent

Dear Sir or Madam,

Your child would like to participate in the **Level GO 2025-2026** program organised by the *Luxembourg Tech School, asbl (LTS).*

Because of the digital as well as innovative and ambitious nature of the program, the usage of certain computing tools linked to the Internet is required for your child to be able to fully participate in the program and successfully complete it.

The LTS complies with the provisions of EU Regulation 2016/679 (GDPR), particularly with Article 8 paragraph 1 relating to the consent of minor children (below the age of 16 years) for the processing of personal information during uses of online services.

Therefore, we provide on the following page a list of the computing tools that your child will need and/or be able to use to fully participate in the *Level GO* program. This list includes only the computing tools that require the creation or utilisation of a user account. The user accounts will be created and activated during the course. After the end of the course, we recommend that the accounts which were created only for LTS usage be deleted.
Please note that the respective confidentiality remarks for each computing tool are to be considered and that LTS can in no way be held responsible for any wrongdoings of the service provider(s).

Please either give this signed Parental Consent to your child for the next lesson or send it to us directly by email to: contact@techschool.lu

You can check the Privacy Notice of the Luxembourg Tech School, asbl at
https://www.techschool.lu/privacy-policy.pdf

Thank you in advance and kind regards,
Luxembourg Tech School, asbl
